I am a long term resident of upstate NY in the Finger Lakes region. I am 23 and beginning a family of my own and am terrified of the health issues that hydro fracking will cause! I cant raise a family in the most beautiful place in this country if my family and my health is invaded the way it will be if fracking come here. Please dont kill my family, dont risk my families lives for some thicker wallets for politicians who want even be affected by this horrible drilling.

I understand that my comments will be submitted to the Department of Environmental Conservation as an official public comment in response to the NYS Department of Environmental Conservation's draft Supplemental General Environmental Impact Statement regulating the use of hydrofracturing in the natural gas drilling process.
